NUMBER 54

The Wisconsin Senators will stand by the President in this unfortunate contest with Mr. Conkling.

The more the star route business is shown up by investigation the greater appears to be the swindle.

A Washington dispatch says the best judgment of unbiased Republicans clearly is that Robertson will be confirmed.

The funeral of Mrs. Kerwin recently occurred in Beloit, and it is worthy of note that her four sons were the pall bearers.

Mr. Conkling and his friends have a good deal to say about the President trying to coerce the Senators, but they have nothing to say about the bold and unwarranted attempt of certain Senators to coerce the President.

The only way Mr. Conkling can beat the President is with Democratic votes. He can't do it with the Republican votes in the Senate. But Conkling is not particular as to the means he uses to carry his point. He never was.

Over-work has got to be such a rare thing in the United States, that the associated press in New York takes the pains to telegraph it over the country that a boy died of over-study and a woman killed herself by over-work.

The Milwaukee Sentinel thinks the prospects for Republican victories next fall are not especially brilliant. The Sentinel is noted for looking on the gloomy side of the Republican situation. But just wait till next fall if you want to see some splendid fighting and magnificent victories by the Republican party.

Mrs. Fassett, of Washington, who painted the Electoral Commission for Congress, and in doing so did a remarkable fine piece of work, has just finished a portrait of Matt Carpenter which is regarded as one of the best portraits of the Senator that has yet been painted. Judge Jere Black has not yet seen the portrait, but he has said if he likes it he will purchase it and present it to Mrs. Carpenter.

The death of Mr. Arch N. Devoe, at St. Joseph, Missouri, Saturday night, was a sad one when all the facts connected with his life are taken into account. At one time he was private secretary to Governor Robinson, of New York, and had been connected with several prominent papers. He was finely educated and became well known in New York politics and journalistic circles. But he conceived the idea that life was a failure so far as he was concerned, and last Saturday while stopping at a hotel in St. Joseph, alone and away from home, he resolved to put an end to the struggle for a living, and took a dose of morphine, and died. He was forty-five years old, and had a father living at Elmira, New York, to whom he addressed a simple line, "Life is a failure."

WON'T HAVE IT.

Grier Says He Won't Have the Third Assistant Postmastership.

WASHINGTON, May 10—Some surprise has been expressed that the President did not sooner withdraw the name of Grier, nominated for third assistant postmaster general, as Mr. Grier had said so often that he would not accept. It is now learned that the President himself did not think that Grier would finally decline until a few days ago. When the position was first tendered, Grier told the President that it was not the place he wanted. "Go home and talk to your wife about it," said the President, "and I think you will accept." A few days ago, however, the President received a letter from him setting all doubts at rest. Among post office officials it is considered singular that Grier should decline the Third Assistant's place, as it is much less laborious than the Second Assistant's place, and as good a salary. Grier's declination, and Freeman as the Attorney General, which he is desirous to retain, Hazen is indifferent whether he be continued Third Assistant or takes Freeman's place, but Freeman is very anxious to remain. The most difficult position in the whole department is that vacated by Brady and taken by Elmer.

REPUBLICAN CAUCUS.

No Conclusion Reached Regarding the Action on Robertson's Nomination.

WASHINGTON, May 10—The Republican Senators have not yet decided what to do with the Robertson nomination. Nearly five hours were spent in caucus again to-day, and when the conference adjourned it was agreed to meet subject to the call of the chairman. Senators are extremely reticent as to what occurred at the meeting, but it is definitely announced that no decision regarding a future policy has been reached.

The speech delivered by Senator Conkling yesterday has undoubtedly produced a profound effect in the minds of certain Senators who had previously determined to vote for Robertson's confirmation. While the Senators have signified no intention of voting to reject Mr. Robertson's nomination, their desire to be spared the alternative of taking sides on the question has been quickened.

The adjournment of the caucus without coming to a vote was in pursuance of a general feeling that further efforts should be made to effect harmonious understanding between the President and Mr. Conkling. The friends of the Senator from New York have never ceased to hope that some adjustment of the difficulty might be reached, and it is thought that the free interchange of opinion in the caucus has been of value in giving all the Senators a clear understanding of the situation. Whether the President will consent to change his programme in the least degree, remains to be seen. Thus far he believes he has done only the right thing, and he has repeatedly expressed the determination not to withdraw Mr. Robertson's nomination for collector of the port. It has been suggested that an easy way out of the difficulty would be to nominate Wm. E. Chandler for collector of the port of New York, and Judge Robertson for solicitor general, but it is not known whether this change of programme would meet with the approval of either the attorney general or the Senator from New York. The discussion in the caucus was mostly of a colloquial character.

MRS. LINCOLN.

SPRINGFIELD, Ill., May 10—Mrs. Lincoln, who is now making her home with the family of the Hon. Ninian W. Edwards, her brother-in-law, in this city, is in a precarious state of health, and is slowly declining every day. She is confined to her bed most of the time, and requires constant medical attendance. She is a sufferer from an injury received in her back by a fall in Europe two years ago, and which caused Bright's disease of the kidneys. Her nervous system is almost completely prostrated, and at times her mental distress is very

great. This is attributable to the great shock to her mind by the assassination of her husband by her side on that memorable night of April 14, 1865. She is tenderly cared for by her sisters, Mrs. Ninian Edwards and Mrs. C. M. Smith, who are with her constantly, and do all they can to alleviate the sufferings of the patient. Should she be able to bear transportation, it is probable that she will be taken to New York next month for medical treatment, and to the seashore for the benefits of sun baths and the ocean breezes.

MRS. PRESIDENT GARFIELD

WASHINGTON, May 10.—Mrs. Garfield is suffering from a severe attack of nervous prostration somewhat aggravated by malaria. The physicians assure the President no danger need be apprehended, that careful nursing and entire freedom from all annoyance and worry will work a cure.

THE REMAINS OF WM. PENN.

HARRISBURG, Pa., May 10.—In the State Senate a resolution was unanimously agreed to and sent to the House for concurrence looking to the transfer of the remains of William Penn from the Jordan Meeting House graveyard, Buckinghamshire, England, to Philadelphia. The resolution also provides that copies be sent to Peter Penn, at Gaskell, Ireland, and William Stewart, England, representatives at law of William Penn, asking their co-operation in the matter, and requests the co-operation of the President of the United States, if necessary, in securing the object.

BODIES RECOVERED.

ELGIN, May 10.—The bodies of Elmer Huntley and Leo Taylor, two more of the victims of the ferry disaster, were recovered to-day, making five now found. Huntley's body was found at the railroad bridge, caught by the wires, and Taylor's floating at East Elgin, three miles below. Both were badly decomposed. The former has been sent to Algonquin for burial, and the funeral of the latter occurred at the Congregational church this afternoon. The church was crowded, the high school, of which he was a member, attending in a body. These bodies rose during the night, it is thought, by reason of the explosion of a jar of slackening placed in the river. Fifty dollars reward was offered for the recovery of each. Two more bodies are known to be yet in the water.

A SERIOUS FRESHET.

ELKHORN, May 10—The severe rain of yesterday and last night swept away nearly all the bridges in this vicinity; but few remain on Sugar and Honey creek and their tributary branches. Yesterday at 6 p.m., Mr. P. V. Wiswell, living on the Sugar, in fording the creek on horseback near his residence, having his young daughter in his arms, whom he was bringing home from school, had his horse swept from under him, and both father and child were carried away by the current several rods before rescue reached them in the shape of a floating tree and fence. Other casualties are reported as the result of the flood, but no losses of life have occurred.

MATRICIDE--SUICIDE.

A Wisconsin Man Attempts to Kill His Mother and Then Himself—The Prospects Are that He Will Be Successful in Both Attempts.

MADISON, May 10.—A shocking attempt at matricide, supplemented by the attempted suicide of the criminal, is reported from the town of Rutland, eighteen miles southeast of Madison. The first intelligence of the horrible occurrence was received at Stoughton, the nearest telegraph station, about 10 o'clock to-day, when a messenger rode in from the residence of E. S. Drake, a farmer living a few miles west of Stoughton. He reports that at about 9 o'clock this morning Danks had attempted to kill his mother with a hatchet, and then tried to kill himself with the same weapon. He succeeded in cutting the old lady's throat so as to sever the windpipe, and then drew the hatchet across his own throat with the same effect. Medical attendance was immediately summoned, but all to no purpose. They say that both will die. The reasons assigned for Danks' rash act are that his mother, who is about seventy years old, is partially deranged, and has been a source of trouble between her son and his wife. Danks himself has also been with fits of insanity. Both Drunks and his mother are yet alive, though in an extremely precarious condition. Later on in the day he seemed to realize the enormity of his crime, and was overwhelmed with remorse. A report received from the residence of Danks to-night was that both were yet alive. Danks is a kind-hearted, charitable man, highly respected by his acquaintances.

A Society of Vegetable Eaters.

There is a society of men and women in California called "Fraternia." They are horticulturists and vegetarians of the severest type. Not only do they eat no animal food—neither fish, flesh, fowl, eggs, milk, butter nor cheese—but they eschew also all cooked food. Articles derived from animal organisms nourish only the physical part of man, they say, and aver that the same is also true of any cooked food, because the spiritual essence of fruits and vegetables which goes to build up the spiritual body is, by cooking, dispelled into air. What is left feeds the physical only, thus tending to animalize man instead of developing his spiritual or (as the philosophers would say) his psychic body. This theory "Fraternia" has now carried into practice for two years with satisfactory results. Fruits, melons, nuts, grains in their natural state or ground, certain vegetables and berries of all sorts, in such combinations as women's ingenuity has undoubtedly suggested, constitute their spiritual bill of fare.

"Do American industries thrive abroad?" asks a correspondent. Certainly; one industrious young American has just married the richest woman in England.

PHRASES USED IN WALL STREET.

Bear market—When the market is heavy and falling, and lower prices are expected, in consequence of the efforts of the "bears."

Bear the market—i. e., operate for a decline. A bear is naturally "short" of stocks and expecting to profit by a decline.

Borrowing and loaning stocks—When a party has sold stock and has not bought it in by the time delivery must be made, he "borrows" the stock for the purpose of making a delivery, paying the owner the market price at the time and agreeing to return it at the same price on demand or at a fixed time, the lender of the stock paying the borrower an agreed rate of interest on the money, or the borrower paying the lender an agreed premium for the use of the stock, as the case may be.

Cover, to "cover one's shorts"—Where stock has been sold short and the seller buys it in to realize his profit, or to protect himself from loss, or to make his delivery. This is "covering short sales."

A call—The privilege obtained, for a consideration, of calling for a certain number of shares of stock, at a given price, within a time named.

Carrying stock—Holding stock by a broker for his customers on a margin.

Clique—A combination of operators formed for the purpose of artificially influencing the market by their combined operations.

Corners—When the market is oversold, the shorts, if compelled to deliver, sometimes find themselves in a "corner."

Curbstone brokers—Men who are not members of any regular organization and do business mainly upon the sidewalk.

Flyer—is a small side operation, not employing one's whole capital or not in the line of his ordinary operations.

Lamb—A very green "outsider" who essays stock speculation.

Limited order—An order to buy and sell within a certain fixed price, above or below which the party giving the order does not wish to go.

Margins—Where one buys or sells for speculation, and deposits with his broker a percentage of value to enable the latter to "carry" the stock and protect him against loss from fluctuations in value.

Milking the street—The act of cliques or great operators who hold certain stocks so well in hand that they cause any fluctuations they please. By alternately listing and depressing prices they "milk" the small operators and the public.

Put—to buy a "put" is to obtain the right, for a consideration, to deliver a stock at a certain agreed price within a given number of days.

Stop order—An order to sell out a stock in case it should decline to a certain price, or to buy in short stock in case it should advance to a certain price. A means adopted by a party "long" or "short" of stock to limit his loss to a certain figure.

Turning stocks consists in buying for cash or regular way, and selling a like amount of the same stock at the same time "on option," thereby making six per cent. interest and any difference that may exist at the time between the market price of the stock for cash and on option, or selling for cash and buying on option, when the stock is hard to carry and the holder, hoping for a rise, does not want to "get out" of it.

Twist on the shorts—A clique phrase used where the shorts have overshot heavily, and the market has been suddenly advanced, compelling them to settle at ruinous rates, or when stocks are withdrawn from the loan market and made difficult to borrow except at a large premium for their use.

Wishing is where one broker arranges with another to buy a certain stock when he offers it for sale. The bargain is fictitious, and the effect, when not detected, is to keep it quoted and afford a basis for bona-fide sales. It is not countenanced by the rules of the Exchange, and if discovered renders members engaged in it liable to the penalty of expulsion.

A young man recently called at a little domicile in Vicksburg. A small boy and a big yellow dog were snuggled on the door-step, and the young man asked: "Will that dog bite?" "Well," said the boy, "it's own to certain things if he do or not. Ef yer want to collect sewing-machine money he's fierce as a tiger, but ef yer got anything to give us he's harmless as a kitten—an't yer, Towser?"

DANIEL GRIFFIN.

Opposite Dr. McCausey's Rooms, have just re-

MILTON JUNCTION.

—Mr. Charles Hutchhausen, who went home to West Bend, some two weeks ago, to recruit up, returned on Monday, and resumed his duties as preparatory for the Northwestern road here.

—Mr. J. S. Mills left, last week, for Oshkosh, where he proposes to spend the summer. His family will follow in a few days.

—Mr. James Fox, the operator of the Milwaukee & St. Paul road here the past year, has been transferred to Janesville, and Mr. Brockway, of Monroe, has taken his place at this station. He has moved his family into the house lately occupied by J. S. Mills, on Vernal Avenue.

—The stockholders of the Newville bridge company hold a special meeting at Morgan's hall on Thursday, to consider matters relative to the future of the company. It is to be hoped that some arrangements will be made that will ensure a rebuilding of the bridge by some body, at no distant day.

—Uncle David Burdick, of this village is growing feeble quite rapidly, being now confined to his bed most of the time. His mind is much impaired and it is very doubtful if he ever rallies again.

—Very many farmers have still a large amount of small grain to put in, the plowing for which in many instances is not yet done.

—B. Thorpe has bought the A. G. Burdick place lately occupied by Charles S. Weeks.

—Miss Myrtle Larkin opened her school last week in the joint district two miles west of this village. She reports a pleasant opening.

—Mr. A. B. Spaulding went to Chicago Wednesday on business.

—Mr. Fred Clark, of Walworth, arrived in town Monday and left that evening in company with his brother Charlie for the north looking after the future of their shipping interests from this station.

—Mr. George Button was home on the sick list on Tuesday.

—Peter Deary, the barber, has rented the old express room at the Morgan house, and proposes to move his shop there in a day or two. It will be a much better location.

—Alanson Coon has the drugstore to commence his new house, corner of Vernon Avenue and Janesville street, next week.

—Nine men all told, employers and employed, are engaged exclusively in the farm machinery trade in this little town, and all seem to be as busy as bees.

—Water in Lake Koshkonong has gone down over four feet and is still higher than the usual high water mark.

—Two or three more sales of tobacco last week at prices ranging from 8 to 9 cents.

—Mrs. W. W. Brown, of Bradford, Pa., sister of Mrs. Wm. Hemphill, is spending a few weeks visiting at the home of the latter.

—Mrs. Chas. Clark, went to Walworth Monday, to spend a few days visiting friends.

—Mr. Kasson, of Utters Corners, left here on Monday night with a car load of horses and his household goods, for Sleepy Eye, Dakota, where he proposes to engage in the livery business.

—Bennajah C. Hall, an old resident of the town of Albion, living two miles North of the Newville Bridge, died on Monday night of inflammation of the lungs, his name is familiar to most of our citizens.

—N. E. Maxon returned from Mich., last week where he spent a few weeks visiting friends.

—Rev. Mr. Dunn, preached for the Congregationalists in this town, Sunday last.

—Geo. Wallace and bride of Milwaukee, together with another newly wedded couple from the same city, spent last week ruralizing, in this quiet town. Mr. Wallace is a nephew of the Morgan Bros. of this place.

—Fraud.

Tens of thousands of dollars are squandered yearly upon travelling quacks, who go from town to town professing to cure all the ills that our poor humanity is heir to. Why will not the public learn common sense, and if they are suffering from dyspepsia or liver complaint, invest a dollar in Spring Blossom, sold by all druggists and endorsed by the faculty. See testimonials. Price 50 cents, trial bottles 10 cents.

Sold by A. J. Roberts and Sherer & Co.

—Clinton.

—Early sown spring grain is coming forward rapidly and looks strong and healthy.

—Clinton Cheese factory opened for business on the second of the month, with good prospects for a successful season. Mr. George Harris will perform the skilled labor.

—The auction at S. B. Conry's on Saturday the 7th, was well attended and cattle and farming tools sold at fair prices. Mr. Conry, who has sold his bar to A. Woodward will soon move to Nebraska.

—Robert Hartshorn is indulging in a new veranda, on the north side of his house.

—John Cate has an addition to his house.

—Miss Anna Beigart and Mr. Clarence Smith were united in matrimony last week.

—Dr. Crandall has the foundation laid for an addition on the south side of his dwelling.

—Rev. C. C. Marsden contemplates a trip to Europe sometime in June.

—Mr. and Mrs. Geo. W. Loomer, of Millard, Walworth county, spent the Sabbath in Clinton.

—Mrs. Armstrong is now visiting old friends in our village.

—Stephen, the assessor, is abroad in the land, and consequently we hear of much poverty in our midst.

—Several of our citizens are paying large prices for mammoth early potatoes for seed.

—Elder Smith, of Fox Lake, a former pastor of the M. E. church here, was in town last week and officiated at the marriage of his son to Miss Beigart.

—Mr. Amos Bird is making quite extensive improvements to his dwelling house. Mr. Earl doing the work.

—J. R. Hunter is in town for a few days. He came from Nebraska to attend his sister's funeral.

—Covert & Cheever have wall paper, paints and oils and all things necessary to enable people to "fix up."

—Mr. Perkins now occupies the house he purchased of S. W. Serl, next south of R. Owen.

—Our village postoffice has been moved into the building next north of Covert & Cheever's drug store, and when fully completed will be the equal if not superior to any village office in the county—large and roomy, with plenty of light and complete in all its appointments. Mr. Irish is entitled to much credit for this new and improved condition of things.

—Mr. O. H. Florida's new house approaches completion.

—James Baldwin, has moved into his new house on School street.

—Young stock were turned to pasture the first of the month, while everything will "go to grass" by the 10th.

—J. C. Church has nearly completed the foundation for his new elevator.

—Geo. Lampiher is now "monarch of all he surveys," in the lumber busi-

ness over the river of death, on the morning of the 5th inst., and the funeral ceremonies were held at the residence of her husband on Sunday afternoon. She leaves four small children, the youngest being only a few weeks old. Mrs. Rhone was the only daughter of the late Dr. Thomas Hunter and sister of J. R. Hunter, so well known in our State.

—The unusual sight of green grass, hot sunshine, mercury at 80 degrees, spring snow several inches high, and formidable snowdrifts, all in close proximity, was to be seen on the 7th inst.

—Rev. Mr. Leavitt said the words that made Mr. Teachout and Mrs. Lawlus man and wife, one day last week.

—Fresh Garden seeds at Covert & Cheever's.

—Rain came down in torrents Sunday evening, and at intervals all day Monday.

—Charlie M. Dow is duly installed as clerk at Covert & Cheever's drug store.

—RESCUED FROM DEATH

The following statement of William J. Coughlin, of Somerville, Mass., is so remarkable that we beg to ask for it the attention of our readers. He says: "In the fall of 1876, I was taken with a violent bleeding of the lungs, followed by a severe cough. I soon began to lose my appetite and flesh. I was so weak at one time that I could not leave my bed. In the summer of 1877 I was admitted to the City Hospital. While there the doctors said I had a hole in my left lung as big as a half dollar. I expended over a hundred dollars in doctors and medicines. I was so far gone at one time a report went around that I was dead. I gave up hope, but a friend told me of DR. WM. HALL'S BALSAM FOR THE LUNGS.

—I have taken with me, to my surprise and gratification, I commenced to feel better. My hope, once dead, began to revive, and to-day I feel in better spirits than I have the past three years.

—I write this hoping you will publish it, so that every one afflicted with Diseased Lungs will be induced take DR. WM. HALL'S BALSAM FOR THE LUNGS, and be convinced that CONSUMPTION CAN BE CURED. I have taken two bottles, and can positively say that it has done more good than all the other medicines I have taken since my sickness. My cough has almost entirely disappeared, and I shall soon be able to go to work." Sold by druggists.

—FAIRFIELD.

—The literary society is thoroughly established and is held regularly every two weeks. Next session, Friday evening May 13.

—Miss Laura Putnam began teaching in district No. 1 on Monday May 9. Miss Florence Saxe, of Weymouth, is teaching in the adjoining district.

—M. L. Stone has been on the retired list for a couple of weeks owing to sickness.

—Miss Elma Cutter has a school near Lima, her first term. Miss Mary Brown teaches south of Johnston. Both are late students of the Whitewater Normal school.

—C. C. Collier, of Indiana, will stay here during the summer in the employ of Robert More.

—A heavy rain on Sunday and Monday.

—John Dykeman has begun work on the new addition to his house.

—J. B. Chesebro is in very feeble health.

—Readers are invited to add us by furnishing the news. Hand in by Monday each week.

—Miss Nettie Putnam will take music lessons this summer.

—The greater part of seeding was done last week. Winter wheat is no more generally speaking.

—Miss Bertha Clark and Jennie Serl are taking music lessons of Mrs. Dr. Briggs.

—The village school was opened on Monday by Miss Edna Turner, of Darien who taught the winter term.

MORNING GLORIES.

There are passion flowers for plucking, with the naths and thorns cross. There are paunies golden-hearted, there are asphodels and gorse. And the sun shineth and beckon, sweet as sun.

But the early morning glories, can they bloom for us again?

We have sought for wealth and honor, we have piled our trophies high.

Dust and ashes, goss and laurels, but we pass unbroken by.

On the way, the highway and upon the wind-swept shore.

We are seeking morning glories; will they bloom for us no more?

On above the gracious hill-tops and beyond the moon's red glare.

Where the River smiles its welcome in the On the brows of loved and sainted, in the music of their strain.

Ye purple morning glories; ye shall bloom for us again.

—Caro. B. Bradford, in the Christian Union.

H. H. BLANCHARD'S

Law, Collection, Real Estate and Loan

Office.

Regular Office Hours 9 A. M. to 12 M. 7:30 P. M. to 10 o'clock P. M.

C. Smith & Son's Clothing Store, Janesville, Wisconsin. All business intrusted to his care will be promptly attended to and satisfaction guaranteed.

INSURANCE.

JOHN G. SAXE

Represents Sixteen of the Most Substantial Fire Insurance Companies of Europe and the United States.

Also Agent for the Auto Life and the Mutual Protection Association of Wisconsin, the most reliable Insurance Association in the West. His farms in Rock county and elsewhere to exchange for city property, and money to loan.

A Scientific Railway Car.

There arrived at our depot, yesterday afternoon, a passenger car the like of which is not to be found anywhere in the world. It is the property of Mr. P. H. Dudley, inspector of the tracks and apparatus of railroads, and this gentleman and his wife live in this car. A reporter of the *Sun* called on the occupants yesterday afternoon and was entertained for nearly an hour with the explanations of and experiments made with the large piece of machinery by which the gentleman accomplished his work. It is of the most complicated and delicate nature, and the amount of work done by it is marvelous. A description of it would be wearisome, with its systems of cogs, switches, wires, pens, etc., etc., and would be almost unintelligible, but an idea of its extraordinary work may be gained from the following summary of its accomplishments:

A band of plain paper, about twenty inches wide, is fed from a roll into the machine, passing under a complex set of overflowing pens. For every fifty feet of track passed over by the car this paper band moves one inch, thereby taking eight and a fraction feet for a mile of road. By carefully constructed and adjusted machinery, connected with the wheels of the car, the operator obtains upon the paper a perfect chart of every foot, yes, every inch of the road. The instrument shows: first, the power required to draw the train; second, a pen marks on the paper the seconds of time in transit; third, another pen marks every tenth second in the same way; fourth, still another pen marks each minute. Then comes a schedule showing the distribution of coal used by the engine; the amount of water used by the engine; a perfect diagram of the track is delineated, showing all curves, grades, etc.; the number of revolutions which the driving wheels of the engine make in a minute or mile, or parts of these two; the location of the mile posts are shown, as also the bridges; the work done by the engine, so given that the foot-pounds of work can be readily ascertained by multiplying the ratios, the velocity and resistance of the wind. All these are plainly and accurately shown upon the diagram. When used to inspect the track, the machine shows the surface of each rail, giving the condition of each joint, frog, etc., and shows at a glance whether the rails are fitted perfectly, truly, or the least trifle out of place, or if one is a hair's breadth higher than another. The elevation of the rail on a curve is shown and a machine has just been added, which Mr. Dudley, inventing, giving the exact amount in feet and inches that the rails are depressed from a true line. Another section of the chart gives the exact movements of the engineer when the brakes are applied, when steam is put on and the power required to stop and start the train. Mr. Dudley examines a road in this way, hands his chart to the superintendent, and that gentleman knows at once just where to make repairs and all other useful particulars. The machine, he having spent eight years perfecting it, and save one which he made and sent to Australia, is the only one in existence.

Besides this workroom there are a nicely furnished library and parlor, containing cabinets and a fine piano, a dining-room, kitchen, bedroom and store-room. All this in a common size passenger coach and in it Mr. and Mrs. Dudley have lived for the last four years, traveling all over the United States. The lady says the life is a very pleasing one and she enjoys it much. Both the lady and gentleman are finely educated and entertaining people and an hour spent in their company is a very profitable one.—*Pittsfield (Mass.) Sun.*

The Blistering of Apple Trees.

Sometimes since I saw a communication written about the blistering of apple trees. For some years I have been an observer of this, and have come to the conclusion that it proceeds from two causes:

1. When our winters are warm, and springs early, the sap in the trees starts, which causes the new wood to begin to grow, after which late frosts are so hard as to freeze through the bark, and so affect the new wood that has begun to grow that it is killed and turns black and causes the bark to blister.

2. In the hot days of July and August, the same is caused by the sun shining on the bark with so much heat as to scald the new wood and kill it, the same as frost did, and this causes blisters.

So far I agree with your correspondent; but he does not give a remedy for the prevention. From my own experience I will give you my remedy, and I am quite certain the readers of the *Farmer* will believe it true in most cases. In the first case, in the early part of winter tread the snow down firmly all round the trees; this will cause the ground to freeze hard, and thus prevent the early growth of the new wood till the later frosts of spring are past. In the second place put in front, or on the south side of your trees, boards three or four feet long and ten or twelve inches wide, so as to keep the sun from shining on the body of the tree, and this prevents the heat from injuring the inner wood. In the last place, most orchardists will, if they have been close observers, see that most all trees are never seen to blister from the sun's rays after the limbs were spread enough to shade them.—Cor. *New England Farmer*.

A Significant Fact.

The cheapest medicine in use is Thomas' Electric Oil, because so little of it is required to effect a cure. For croup, phthisis, and diseases of the lungs and throat, whether used for bathing the chest or throat, for taking an hour or inhalation, it is a most useful compound. Sold by A. J. Roberts and *Co.*

CIRCUIT COURT, ROCK COUNTY.—Ursula A. Monders, plaintiff, vs. James H. Myrick, defendant.

The State of Wisconsin, to the said defendant and each of his heirs, executors, and successors, hereby summoned to appear within twenty days after service of this summons, exclusive of the day of service, and defend the cause of action against him, and in case of your failure so to do, judgment will be rendered against you according to the demands of the complaint, of which a copy is herewith served upon you.

BENNETT & SALE.

P. O. Address, City of Janesville, Rock county, apidew2w

How to Improve or Retain the Productiveness of Grass Lands.

In many localities grass and hay farming is the most economical and profitable culture the farmer can pursue. But here, as elsewhere, the question comes up: "How shall I improve or retain the productiveness of my grass lands?"

The usual reply given is: "Break up and stock down again," and this course is most frequently followed, cultivating to some crop where manure is applied and seeding with some sort of grain; but when seeded the ground has scarcely any more plant food in the soil than when the soil was broken, if not actually less.

Oftentimes this expensive course may be abridged and the course decided upon from the appearance of the grass. If some parts are mossy, boggy, or grow certain coarse grasses, indicating water at the bottom, the first and most important step is thorough drainage, this often being sufficient for the time being. Plowing or manuring, or both combined, will in this state be useless as compared with doing the same after draining. If the trouble is not in a wet bottom or foul and troublesome weeds, it may usually be looked for in impoverishment of the surface soil from long and severe cropping without due compensation. To remedy this, often all that is essential may be accomplished by giving a good dressing of good, well-tilled manure, harrowing to scarify the surface and still further fine the manure, after which sow grass seed of the desired variety liberally and finish with a seed or smoothing harrow. Now if a liberal dressing of manure or special fertilizer be given annually the object is accomplished, for you will give as well as take, and the give should exceed the take so long as you wish to improve. If there are only bare spots occasionally these may be covered by manuring, scarifying and seeding, as above; but where the grass has given place to foul weeds, etc., the only best resource is to break up, manure heavily and cultivate to hoed crops till the weeds are subdued, and then seed down to grass, either with or without some grain crop. I prefer the latter, and seeding during August or September.

The reason our soils are exhausted is that we ask too much while willing to pay too little, a species of robbery which reacts on the pocket of the would-be robber.—Cor. *N. Y. World*.

Extracting Sugar from Corn-Stalks.

At the recent meeting of the American Agricultural Association, Dr. Peter Collier, of Washington City, made some remarks concerning the valuable process of extracting sugar from corn-stalks and sorghum. He said:

"During the past year there have been examinations made of 58 varieties of sorghum grown in, and received from, 14 different States, and from nine varieties of Indian corn. The results of analyses made, 1,318 in all, of the sorghums, showed them to yield on an average 1,662 pounds of available sugar. From four of these varieties the sugar was extracted in quantity and at a rate of fully 2,000 pounds per acre. As to the corn-stalks, the results were most satisfactory; but the experiments were not so numerous as with sorghum. An average of 26 analyses of the nine varieties examined showed them to contain in their juice an amount of sugar greater in quantity than the average of the best 30 specimens of 60 specimens of sugar-beets grown in different parts of the country. After a large crop of ripe corn had been gathered, the stalks yielded at the rate of over 900 pounds of sugar to the acre, and there appears no reason to doubt that this result could be obtained upon a large scale. In view of these results I feel justified in saying that there appears no reason to justify us in importing sugar which would not justify our importation of corn and wheat.

In view also of the gradual but decided improvement of our Western lands, which a carefully compiled record of the acreage yield for the past 18 years establishes, it seems most wise that we turn our earnest attention to this question of sugar production. You are also aware that dry soda will not do unless it is surrounded with a cloth moist enough to dissolve it. This cloth of moistening it on and covering it with a wet cloth is often the very best. But it is sufficient to wash the wound repeatedly with a strong solution. It would be well to keep a bottle of it always on hand, made so strong that more or less settles on the bottom. This is what is called a saturated solution, and really such a solution as this is formed when the dry soda is sprinkled on and covered with a moistened cloth.

How to Improve or Retain the Productiveness of Grass Lands.

—If, when bread is taken from the oven, the loaf is turned topside down in the hot tins, and are allowed to stand a few minutes the crust will be tender and will cut easily.

Cut all grape-vines received from the nursery this spring so that but one cane remains and upon this permit but one bud to grow. Pinch out every axillary bud (or lateral) as it unfolds. By this plan a single strong cane will be produced, that will probably fruit the second season.

Cream Corn Cake.

Three cupfuls of corn meal, one cupful of flour, two

cupfuls of sour milk, half a cupful of cream, one egg, one teaspoonful of salt, saleratus enough for the sour milk. Beat thoroughly, and bake in shallow pans.

—Effects of the Epizooty.

—The disease known as the epizooty is an inflammation of the lining membrane of the air passages, accompanied by fever and swelling of the glands of the throat. It often leaves those membranes thickened by the breathing is rendered difficult, especially when it is accelerated by work or exercise. The remedy is to feed only dry oats and timothy hay and no clover, and give half an ounce of gentian root powdered, and half a drachm of iodide of potassium every morning for two or three weeks.—N. Y. Times.
